

**Project design phase-1**  
**Proposed solution template**

Date	24 september 2022
Team ID	PNT2022TMID39826
Project Name	Real-Time Communication System Powered by AI for Specially Abled
Maximum Mark	2 Marks

**Proposed Solution template**

Project team shall fill the following information in proposed solution template

S.No	Parameter	Description
1.	Problem statement(problem to be solved)	The specifially abled problem that you help with technologies disabilities.
2.	Idea/solution description	To treat with technology of brain chip sensor.
3.	Novelty/Uniqueness	These constructs in health promotion to stress.
4.	Social Impact/Customer satisfaction	Attitude and tradition have to change for the 'differently abled' persons.
5.	Business Model (Revenue Model)	Business model is the operational and transcation
6.	Scalability of the solution	An individual has different capabilities comparative to an average person.
S.No	Parameter	Description
1.	Problem statement(problem to be solved)	The problem should be treat with sensors.
2.	Idea/solution description	These changes can affect your overall specially abled persons.
3.	Novelty/Uniqueness	The experience of variety and novelty

4.	Social Impact/Customer satisfaction	The significant of positive influence based on the persons.
5.	Business Model (Revenue Model)	To worthy causes of treatment.

6.	Scalability of the solution	An individual has different capabilities comparative to an average person.
<b>S.No</b>	<b>Parameter</b>	<b>Description</b>
1.	Problem statement(problem to be solved)	Lack access to employment oppurtunities
2.	Idea/solution description	A variety of medical problem based on specially abled persons.
3.	Novelty/Uniqueness	The definition of variety and novelty
4.	Social Impact/Customer satisfaction	Based on thoughts of common persons.
5.	Business Model (Revenue Model)	It includes a number of initiative
6.	Scalability of the solution	Focusing on scaling a specially abled persons.
<b>S.No</b>	<b>Parameter</b>	<b>Description</b>
1.	Problem statement(problem to be solved)	There is a need for guidance and counselling.
2.	Idea/solution description	The treatment of specially abled persons with AI program.
3.	Novelty/Uniqueness	Constructs in health promotion
4.	Social Impact/Customer satisfaction	Always attract potential visitors
5.	Business Model (Revenue Model)	Achieving true the health promotion

6.	Scalability of the solution	True scalability and sustainability
